

# Under Construction

## CAMPUS PROJECTS MOVE FULL SPEED AHEAD

**ISR Dining and Facility Renovation and Addition**

*More than 50 capital improvement projects transformed the campus in the summer of 2018:*

### **Substantially Completed**

**Everitt Laboratory.** The two-year renovation project included the creation of 11,000 square feet of the new research area and associated support space in addition to extensive interior and exterior upgrades. The modernized Everitt Laboratory will be the new home of the Department of Bioengineering.

**Burrill Hall—Molecular and Cellular Biology Center for Undergraduate Advising & Instruction.** Nearly 17,000 square feet of vacated library space has been updated for future instruction and advising needs.

### **Under Construction**

**Illinois Street Residence Dining and Facility Renovation and Addition.** The dining space will add nearly 36,000 square feet to serve more than 1,100 residents and visitors and to provide meeting, recreational, and library space. Construction just began and will continue for two years.

**Bruce D. Nesbitt African American Cultural Center.** Construction continues on a new two-and-a-half story building, which will include offices, a conference room, kitchen, music/dance room, computer lab, and social gathering space. Substantial completion is anticipated in early 2019.

**Illinois Football Performance Center.** Construction of the new performance center at the northeast corner of Memorial Stadium, adjacent to the indoor practice facility, will continue into next year. The facility will house football team rooms, locker room, a sports medicine area, strength training areas, and offices.

### **Siebel Center for Design at Illinois.**

The groundbreaking ceremony took place in April, and construction is just getting underway for the new 60,000-square-foot design center facility in central campus. The Siebel Center will offer tools and space for students to advance technology through collaboration and an interdisciplinary approach.
